Department of Computer Science and Engineering

ASSESSMENT TOOL 3 – Technical Presentation

Course Code:	CSA0309	Course Title:	Data Structures
CO Assessed:	CO1 – Imitation (BL3, BL4)	Assessment:	Assessment Tool 3 – Technical Presentation
Weightage:	35% of CIA	Total Marks:	100
CO1 Statement:	Apply suitable data structures and ADTs for efficient problem solving by analyzing time and space complexity.		
Student Name:		Reg. No.:	
Section / Batch:		Date:	13/07/2026

Code of Conduct

I _____ (Name / Reg No)
certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.
Signature of the Student: _____

Instructions

- This assessment contains technical presentation. Total: 100 Marks.
- When a student delivers a technical presentation on a data structures topic, evaluation should be based on the following requirements: Concept explanation, Real-world application and Clarity of presentation.
- Demonstrate clear understanding, not just reading slides
- Use of tools: PowerPoint / Google Slides.
- Duration: 7–10 minutes presentation + 3 minutes Q&A.

Section / Topic	Focus	Q Nos	Marks
Data Structure	Real-Time Applications	1	100
GRAND TOTAL:		100 Marks

Cafeteria Token System Using Queue

CSA 0309 DATA STRUCTURE

PRESENTED BY:

R Paul David (192572144)

UNDER THE GUIDANCE:

Dr. Uma Priyadarshini

ABSTRACT

A cafeteria token system is an efficient application of the Queue Abstract Data Type (ADT), where customers are served in the same order they arrive. This follows the First In, First Out (FIFO) principle, ensuring fairness and preventing customers from being skipped. When a customer receives a token, it is added to the end of the queue, and the customer at the front is served first. This approach reduces confusion, maintains order during busy hours, and improves service efficiency. The queue-based token system is a simple, reliable, and practical solution for managing customer flow in cafeterias.
